# RAUNAK SHARMA

**AI AUTOMATION & FULL-STACK DEVELOPER | AI AGENTS, LLM INTEGRATIONS & SAAS**

📍 Bhopal, Madhya Pradesh, India • raunaksharma88630mt@gmail.com • Portfolio •
github.com/Raunaksharmaq64 • linkedin.com/in/raunak-sharma-q64

## PROFESSIONAL SUMMARY

Early-career Full-Stack & AI Automation Developer focused on building practical AI-powered software, agent workflows, and database-backed SaaS products. Hands-on experience connecting modern user interfaces (React) with asynchronous backend APIs (FastAPI, Express), background task queues (Redis), and operational data stores (PostgreSQL, MongoDB). Architect of real-world business automations—including multi-source lead intelligence scrapers, low-latency conversational voice reception pipelines, and clinical appointment scheduling systems.

## TECHNICAL SKILLS

| | |
|---|---|
| **AI & Agentic Systems:** | AI Agent Workflows, LLM APIs (Gemini, Claude, GPT), Document RAG, Bolna Voice Engine, Prompt Engineering |
| **Programming Languages:** | JavaScript (ES6+), Python, Java (Core OOP), SQL, HTML5, CSS3 |
| **Backend & APIs:** | Node.js, Express.js, FastAPI, RESTful APIs, Webhooks, Web Audio API, JWT Authentication |
| **Databases & Queueing:** | PostgreSQL, MongoDB, Redis (Queue Broker / Cache), JDBC Connectors |
| **Cloud, DevOps & Tools:** | AWS (EC2, S3), Docker Compose, Git, GitHub, Nginx, Playwright, Vercel, Render, Postman |

## SELECTED AI & AUTOMATION PROJECTS

### LeadHunter — B2B Lead Discovery & AI Outreach Engine (Verified SaaS)

`React • FastAPI • PostgreSQL • Redis • SerpApi • Google Gemini`

- Architected an end-to-end B2B lead discovery platform coupling Google Maps geographic coordinate search with automated technical audits and cold outreach draft generation.
- Engineered an automated website diagnostics scanner checking HTTP/HTTPS reachability, domain resolution, and mobile responsiveness to isolate high-intent prospects with missing or legacy websites.
- Integrated SerpApi for real-time map scouting and Google Gemini API to draft personalized, context-aware pitch emails based on detected business weaknesses; utilized Redis for non-blocking scraping queues.

### AI Voice Agent — Autonomous Telephony & CRM Pipeline (AWS EC2 Deployment)

`Bolna Voice Engine • Python • FastAPI • PostgreSQL • Document RAG • Docker`

- Engineered an autonomous phone handling system utilizing the Bolna voice-agent runtime, achieving sub-second speech recognition and conversational audio flow for 24/7 inbound callers.
- Integrated Document RAG (Retrieval-Augmented Generation) on business knowledge PDFs and OPD clinic schedules to ground spoken responses in verified facts and prevent conversational hallucination.
- Built an event-driven webhook pipeline synchronizing audio call transcripts, AI lead intent classification (Hot/Warm/Callback), and scheduled follow-ups directly into PostgreSQL CRM records.

### WhatsApp Automation Agent — Messaging & Clinical Workflow OS (Multi-Instance SaaS)

`Node.js • Express.js • WhatsApp Protocol • PostgreSQL • Gemini AI`

- Developed a business messaging platform featuring dynamic QR-code device pairing, rule-based keyword chatbot triggers, and an interactive Kanban CRM for contact management.
- Implemented a dedicated Clinical Healthcare OS automating 24/7 doctor OPD appointment scheduling, slot collision validation, and automated patient appointment reminders.
- Engineered a state machine conversation engine preventing double bookings; containerized on AWS EC2 with reverse proxy architecture and webhook monitors ensuring zero message drops.

### HostelBuddy — Full-Stack Accommodation Discovery Platform (Live on Render)

`Node.js • Express.js • MongoDB • React.js • JavaScript (ES6+)`

- Developed a full-stack student accommodation discovery portal featuring multi-criteria search filtering across verified hostels, dynamic budget brackets, and room amenities.
- Built a direct owner enquiry routing channel and an administrative listing verification dashboard, eliminating intermediary broker fees.

## EDUCATION

**Lakshmi Narain College of Technology & Science (LNCTS), Bhopal** — 2023 – Present

Bachelor of Technology (B.Tech) in Computer Science & Engineering • Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming (Java), Relational Database Management (SQL), Software Engineering.

## CERTIFICATIONS & INDUSTRY SIMULATIONS

**AWS Academy:** Cloud Foundations (EC2, S3, VPC Networking, Cloud Architecture)

**TCS & Tata Group:** Generative AI Career Experience (LLM Architectures, Prompt Engineering)

**JPMorgan Chase:** Software Engineering Simulation (React, Financial Data Feeds, OOP)

**Siemens:** Software Engineering Simulation (Industrial Automation Pipelines, Program Testing)
